

ASEA JOURNAL 1974

VOLUME 47

PUBLISHED BY

ASEA

VÄSTERÅS, SWEDEN

LIST OF AUTHORS

	Page		Page
<i>Akerberg, B.</i>		<i>Krecker, W.</i>	
Item designation system for electrical installations	87	New standard a.c. motors	27
<i>Andersson, G.</i>		<i>Lindgren, A.</i>	
Chopper-controlled d.c. locomotives for ore transport	137	The power supply for the Hylte Pulp and Paper Mill	111
<i>Bood, L.-G.</i>		<i>Nilsson, B. & Solheim, R.</i>	
Himmerfjärd Wastewater Treatment Plant in the Greater Stockholm area	131	The development of small distribution substations	34
<i>Boström, R.</i>		<i>Nordström, L.</i> (see Porro, M. & Nordström, L.)	
METOTEST system for the automatic quality control of hot wire rod	91	<i>Porro, M. & Nordström, L.</i>	
<i>Côté, J.Y.</i>		Glare-free outdoor lighting fittings	144
The ASEA transformer plant in Varennes, Québec, Canada	17	<i>Solheim, R.</i> (see Nilsson, B. & Solheim, R.)	
<i>Elvin, S.</i>		<i>Stendal, K.-E.</i>	
Thyristor chopper equipment in subway cars class C7	117	One of the world's largest mine winder installations	79
<i>Heijne, A. von</i>		<i>Stiberg, M.</i>	
Non-destructive testing of steel and non-ferrous metals	59	Production and process control equipment for British Steel Corporation's Anchor Project	3
Non-destructive testing methods	66	<i>Sturesson, S.</i>	
<i>Jonson, G.</i>		The manufacture of printed-circuit boards	51
Outdoor switchyards for power stations and substations in Malaysia	107	<i>Sundberg, Y.</i>	
<i>Klinga, B.G.</i>		Static frequency convertors for induction melting and heating	9
Short-circuit withstand strength of ASEA power transformers	39		

LIST OF CONTENTS

	Page		Page
<i>Research and testing</i>		<i>Semiconductors and static convertors</i>	
Short-circuit withstand strength of ASEA power transformers	39	Static frequency convertors for induction melting and heating	9
Non-destructive testing of steel and non-ferrous metals	59	ASEA receives major order from the Romanian Steel Industry*	21
Non-destructive testing methods	66	New large medium-frequency furnace in operation*	45
Short-circuit tests on outdoor switchgear*	72	HVDC transmission between Denmark and Norway*	47
METOTEST system for the automatic quality control of hot wire rod	91	ASEA drive and control gear for the world's largest paper machine*	47
Handy machine keeps wheels turning smoothly*	127	Thyristor convertor for Barsebäck 1 Nuclear Power Station*	71
<i>Materials</i>		300 thyristor-controlled vehicles help to conserve energy*	71
The manufacture of printed-circuit boards	51	Reflex detector*	102
Non-destructive testing of steel and non-ferrous metals	59	Thyristor chopper equipment in subway cars class C7	117
Non-destructive testing methods	66	Chopper-controlled d.c. locomotives for ore transport	137
METOTEST system for the automatic quality control of hot wire rod	91	Opto-coupler*	149
Superoriented electrical steel*	150	Energy-saving subway cars for Stockholm*	149
Dip forming plant in Yugoslavia*	151	ASEA drives and controlgear for new plate mill in Finland*	150
<i>Computers and process control</i>		<i>Electrical, electronic and hydraulic equipment</i>	
Production and process control equipment for British Steel Corporation's Anchor Project	3	The development of small distribution substations	34
Computer system for controlling papermaking process*	21	ASEA drive and control gear for the world's largest paper machine*	47
Two production control and material tracking systems for Norrbottens Järnverk AB*	43	The manufacture of printed-circuit boards	51
Process control equipment for GRÄNGES ALUMINIUM, Sweden*	48	Short-circuit tests on outdoor switchgear*	72
<i>Nuclear power</i>		Instantaneous over-current relay type RXIB 2*	76
Finnish nuclear power station ordered from ASEA-ATOM*	21	Item designation system for electrical installations	87
STAL-LAVAL's largest turbine hitherto to be supplied to Finland*	24	Outdoor switchyards in Malmö, Sweden*	99
Thyristor convertor for Barsebäck 1 Nuclear Power Station*	71	New temperature control system with static heat pump*	101
<i>Turbines</i>		Reflex detector*	102
STAL-LAVAL's largest turbine hitherto to be supplied to Finland*	24	D.C. time-lag relay*	104
Back-pressure turbine ordered from Brazil*	75	Outdoor switchyards for power stations and substations in Malaysia	107
Licence agreement with AESA, Spain*	75	The power supply for the Hylte Pulp and Paper Mill	111
STAL-LAVAL's first combined-cycle gas turbine sold*	103	Electricity and hydraulics for automation in industry*	125
<i>Electrical machines</i>		Himmerfjärd Wastewater Treatment Plant in the Greater Stockholm area	131
ASEA receives major order from the Romanian Steel Industry*	21	MAGNADISC filter for wastewater treatment*	146
ASEA generators for La Angostura Hydro-electric Project*	22	Opto-coupler*	149
New standard a.c. motors	27	ASEA drives and controlgear for new plate mill in Finland*	150
Synchronous condensers for Canada*	43	New current transformer type IMBE*	152
ASEA drive and control gear for the world's largest paper machine*	47	<i>Lighting</i>	
Thyristor convertor for Barsebäck 1 Nuclear Power Station*	71	Glare-free outdoor lighting fittings	144
ASEA generators on the Blue Nile*	73	<i>Transportation and materials handling</i>	
The power supply for the Hylte Pulp and Paper Mill	111	First transport with world's longest railway wagon*	23
Electricity and hydraulics for automation in industry*	125	Tramcars for Melbourne, Australia*	44
Handy machine keeps wheels turning smoothly*	127	300 thyristor-controlled vehicles help to conserve energy*	71
Unique multi-drilling machine for bicycle wheel rims*	128	Digging deeper for copper*	74
ASEA drives and controlgear for new plate mill in Finland*	150	New Zealand forklift truck uses ASEA components*	75
<i>Transformers and capacitors</i>		One of the world's largest mine winder installations	79
The ASEA transformer plant in Varennes, Québec, Canada	17	\$A400 million hole for copper*	100
First transport with world's longest railway wagon*	23	Overhead travelling cranes for Norrbottens Järnverk AB, Sweden*	102
Short-circuit withstand strength of ASEA power transformers	39	Thyristor chopper equipment in subway cars class C7	117
The power supply for the Hylte Pulp and Paper Mill	111	Steelworks cranes for Firth Brown Ltd., England*	126
Record transformer manufactured by ASEA*	148	Handy machine keeps wheels turning smoothly*	127
Superoriented electrical steel*	150	Unique multi-drilling machine for bicycle wheel rims*	128
New current transformer type IMBE*	152	Chopper-controlled d.c. locomotives for ore transport	137
		"Second generation" ASEA container cranes in Australia*	147
		Energy-saving subway cars for Stockholm*	149
		Co-operation between ASEA and Tetra Pak*	151
		<i>Furnaces</i>	
		Static frequency convertors for induction melting and heating	9
		New large medium-frequency furnace in operation*	45

* News in brief

	Page		Page
ASEA furnace equipment for a new British precision steelmaking plant*	98	ASEA drive and control gear for the world's largest paper machine*	47
ASEA-SKF ladle furnaces to be supplied to the Chinese steel industry*	150	Process control equipment for GRÄNGES ALUMINIUM, Sweden*	48
Dip forming plant in Yugoslavia*	151	Non-destructive testing of steel and non-ferrous metals	59
<i>Electric power plants and networks</i>		Non-destructive testing methods	66
ASEA generators for La Angostura Hydro-electric Project*	22	METOTEST system for the automatic quality control of hot wire rod	91
The development of small distribution substations	34	The power supply for the Hylte Pulp and Paper Mill	111
HVDC transmission between Denmark and Norway*	47	Electricity and hydraulics for automation in industry*	125
Short-circuit tests on outdoor switchyards*	72	Himmerfjärd Wastewater Treatment Plant in the Greater Stockholm area	131
ASEA generators on the Blue Nile*	73	MAGNADISC filter for wastewater treatment*	146
Item designation system for electrical installations	87	ASEA drives and controlgear for new plate mill in Finland*	150
Outdoor switchyards in Malmö, Sweden*	99	Dip forming plant in Yugoslavia*	151
STAL-LAVAL's first combined-cycle gas turbine sold*	103	<i>Miscellaneous</i>	
Outdoor switchyards for power stations and substations in Malaysia	107	The ASEA transformer plant in Varennes, Québec, Canada	17
The power supply for the Hylte Pulp and Paper Mill	111	Reprints from the ASEA Journal*	21
<i>Industrial equipment</i>		New Zealand forklift truck uses ASEA components*	75
Production and process control equipment for British Steel Corporation's Anchor Project	3	Licence agreement with AESA, Spain*	75
ASEA receives major order from the Romanian Steel Industry*	21	Reprints from the ASEA Journal*	76
Computer system for controlling papermaking process*	21	Item designation system for electrical installations	87
Two production control and material tracking systems for Norrbottens Järnverk AB*	43	Reprints from the ASEA Journal*	103
QUINTUS® sheet metal forming presses for the Soviet Union*	46	Superoriented electrical steel*	150
		Co-operation between ASEA and Tetra Pak*	151
		Reprints from the ASEA Journal*	152
